## PEDDLE PLUS

A RETAIL MANAGEMENT SYSTEM

Timeous's **PEDDLE+** supports your business whether you operate a single point of sale or many points of sale across multiple locations and is fully compatible with industry leading hardware. Whether your business transacts from a single PC or via a network of retail terminals, Timeous's **PEDDLE+** is fully scalable to meet your needs.

Timeous's Retail Solution "**PEDDLE+**" is a highly functional integrated multi-channel retail system for retailers across the globe. This is built on a wealth of industry knowledge, this increases retailer's knowledge and control of business performance with real-time sales reporting and complete visibility of back office operations. It offers flexibility to handle both single and multiple sales channels across your entire retail organisation. Timeous's **PEDDLE+** helps

to improve sales processes, operational efficiencies, reporting accuracy and internal communications, and identify opportunities for cost reduction. With a powerful business system-Timeous's **PEDDLE+** adds value by providing instant access to critical information, to help make informed decisions.

**PEDDLE+** is organized in such a manner that carries the responsibility of a retailer. Efficient data entry and specially designed reports with on-line filters suit any retail needs.

Despite the power and scope, **PEDDLE+** is amazingly easy software to implement & adopt.

## HIGHLIGHTS

### Save time

**PEDDLE+** helps you to create better system quicker. Despite its power the user interface and work flow are amazingly intuitive.

### Save money

Robust and efficient system with smartest retail techniques saves money.

### Concentrate on your work

With **PEDDLE+**'s easy-to-use and fast-to-learn user interface, all the technical details are handled in the background by the program. What you see is what you get and what you get is what you need.

## Work in a team

With **PEDDLE+** you and your co-workers can all work on the same time. Just enter the data and **PEDDLE+** saves it on server where all team members can access it and get to work. **PEDDLE+** makes sure that you do not have to duplicate the work.

## Highly Scalable

You can use **PEDDLE+** in three ways: run it independently on a single system placed in your outlet, use it on multiple network computers in single outlet or use it across multiple outlets.

## Experience the Power of Modular System

**PEDDLE+** is an independent and selective modular solution. Starting with Inventory module you can later add other modules at your own pace. All the relevant data becomes online immediately on installation and need not be entered again.

## Use Extensive range of Hardware

**PEDDLE+** works with wide range of POS hardware from barcode printers, barcode scanner (CCD, laser and Bluetooth), RFID, data capturing units, standard dot matrix printers to fast and efficient thermal receipt printers, electronic cash drawers, customer display, magnetic card readers, touch screens and electronic weighing scales..

## Security & Zoom In

**PEDDLE+** has multiple levels of robust security and zoom-in facility through a robust permission management in the admin section.

## Effective Solution

Whether you're operating a single store or multi outlets, your goal is to effectively manage stock, cost and profitability. You do that by recording day-to-day transaction, i.e Purchase, Sales, Expenses, Customers Detail, Credit Card Transaction, Banking etc.

# FEATURES:

## Inventory management with bar-coding

The correct inventory structure is the pillar of a strong Management Information System. Correct categorization is half job done in retail industry. **PEDDLE+** Inventory helps you to correctly classify and categorize complete stock accounting for any number of Products and SKUs (Stock Keeping Unit). With our innovative procedures you can avoid common mistakes and create a healthy Item structure which in turn helps you save more & earn more.

## **POS: RFQ (Request for Quotation), Sale Quotation, Sales Order, Sales Return (Exchange, Due & Credit & Stock Management)**

POS (Point Of Sale) –It carries the responsibilities of an operator and enhances productivity. A concise, to the point and ready to use options loads them like a soldier on a war-front. Covers all modes of POS like Normal sale, Exchange, Complimentary. An integrated accounting system helps you to collect payment by multiple modes even later on, with payment alert mechanism.

## **RFQ, Quotation, Purchase Order, GRN, Invoicing, Purchase Return, Supplier Payments**

**PEDDLE** Purchase instantly displays last purchase details, auto-fill last prices, and separate classification for each purchase and to track and monitor good and bad business associates. It also helps to create a correct master when you are adding new products. This will help getting the right stock through GRN (Goods Receipt Note) and invoicing as per the GRN. An integrated accounting system helps to make payment entry at a later date.

## **Repackaging and Warehousing**

Create as many warehouse for stock keeping purposes and use repackaging module for an item's form conversion (useful for novelty stores) or convert big bags to small packets (useful for grocery stores). Physical Stock verification and Adjustment Most required and useful tool to regularly check and update your physical stock count with computer books.

## **Physical Stock Verification and Adjustment**

Most required and useful tool to regularly check and update your physical stock count with computer books.

## **Financial Accounting (General Ledger, Trial Balance, Profit & Loss Account, Balance Sheet, Branch Accounting)**

With wide and flexible classification of accounts in visually tree structure, **PEDDLE** Accounts gives you complete control with ease of work on your business. Instantly obtain your primary books of account with some analysis tools like daily transaction sheet and cost center reporting and verification tools like bank reconciliation statement, cash/bank trial balance with party wise payment due list and bill-to-bill details for cross verifying details with suppliers and customers.

## **Stock Transfer between Locations**

Stock is transferred between stores through a special stock transfer process and are received and processed on user request. Local stock counts are automatically reduced when items are sold to customers or transferred to other stores. Local stock counts are increased as transfer received vouchers are tagged as received.

## **Multiple Tax Structure -**

**PEDDLE** supports multiple tax structure (VAT, Sales Tax, Service Tax) to manage your inventory purchase - sales and financial accounting smoothly. Som this could be operated globally but act locally.

## Chain Store Management

**PEDDLE** Chain Store Management solution is a group of stores using **PEDDLE** and sharing information between each other. The type of information to be shared is controlled by a master store. All other stores are known as branch stores. The means of communicating data between stores is via the Internet, or more specifically, by controlled e-mails. As each store in the Multi-Location group conducts day-to-day business, **PEDDLE** is generating packets of information to be sent and received. These packets of information are distributed at timed intervals or on user request.

## CRM [Customer Relationship Management] with scheme and points

Get intimate to your esteemed Customers by sending an Email on Birthdays and Anniversaries, maintaining their transcripts in different Privilege Club membership is the essence of **PEDDLE**. Multiple Discounts and Price Level schemes based on Value for a Product, a group of products, a customer, or group, or whatever. Set the likes and dislikes of the Customers to cater their needs at POS. Billing System automatically incorporates the same and displays history of Purchase for each Customer at POS.

## MIS (Management Information System)

As the retail actions are performed, **PEDDLE** MIS builds a detailed history of each event. Analysis of this history then provides the basis for merchandising decisions. **PEDDLE** comes with a collection of predefined management reports. Any report can be run for any date range, online filters and multiple options to suit the user. The reason for the wide range of reports available in **PEDDLE** is to give each user just those reports needed to support a particular business and management style. **PEDDLE** offers the finest reports and analysis possible with a large number of standard, ready to use, and highly valuable reports. Reports are incisive, analytical, fast, useful and accurate.

## Chart and Dashboard for better analysis

Good Charts for Better Business. As the saying goes "A picture is worth a thousand words", **PEDDLE** chart and dashboard conveys key points rapidly without difficulties.
